Education

- 10/26 - 08/28 **Technical University of Munich**, Munich, Germany
- BSc Computer Science
 - Incoming first semester student
- 06/26 - 06/26 **Y Combinator Startup School 2026**, Paris, France
- Super inspired by talks from Alexandre Lebrun (CEO at AMI) and James Hawkins (CEO at PostHog)
- 09/25 - 07/26 **Technical University of Munich**, Munich, Germany
- Bachelors (Studienkolleg), Computer Science
 - Note 1.0 (GPA 4.0) - **Valedictorian**
 - Courses: Advanced Mathematics, Higher Physics, Linear Algebra, Calculus, Introduction to Programming
- 06/13 - 04/25 **S. N. Kansagra School**, Rajkot, India
- **Valedictorian** with 97% in Class XII, ranked among the **top 0.1% in India**.
 - Coursework: Advanced Mathematics, Computer Science, Advanced Physics
-

Experience

- 08/26 - Present **Software Engineering Intern at Lyceum**, Munich, Germany
- Providing serverless inference and GPU VMs at a large scale
 - Focused on solving the various issues flagged by our customers
- 05/26 - 08/26 **Software Engineering Intern at Clar AI**, Munich, Germany
- Building the infrastructure for Voice AI
 - Focused on accurate workflows and latency of new voice agents
- 02/26 - 04/26 **Software Engineering Intern at SCALE**, Munich, Germany
- Worked on GEO for our clients.
 - Focused on humanizing and reducing hallucination during mass blog generation.
- 05/25 - 03/26 **Fullstack Engineering Freelancer**, India & Germany
- Designing and building websites for small local businesses. Making sure that the UX is accessible for the client.
 - Stack: React, Next.js, Java, Python and Node.js
- 07/25 - 09/25 **Software Engineering Intern at Sigmoid AI**, Munich, Germany
- Helped build an AI research analyst for hedge funds
- 04/25 - 07/25 **Computer Science Tutor at S. N. Kansagra School**, Rajkot, India
- Taught programming fundamentals, algorithms, linear algebra, and statistics & probability to high school students.
 - Helped students prepare for national-level coding competitions and board examinations.
-

Extracurriculars

- 06/26 - 06/26 **Pyra**
- Built a digital-twin O&M console for utility-scale solar plants that detects underperformance, cause and euros lost
 - Trained my own per-inverter ML model (HistGradientBoosting on each unit's healthy year)
 - Stack: Next.js 16, Python (scikit-learn, pvlib, pandas, duckdb), and Claude
- 05/26 - 06/26 **Portfolio**
- My projects, experiences and achievements
 - Inspired by a few awwwards websites
- 04/26 - 04/26 **Aliquot**
- Built an AI-powered experiment planner from a plain-language scientific prompt.
 - Stack: Next.js 16, React 19, Tailwind 4, Claude, Tavily, and Supabase
- 02/25 - 02/25 **Hashi**
- Built a logic puzzle inspired by an old japanese game with graph-based algorithms.
 - Stack: TypeScript, React, and CSS3, Vercel
- 02/26 - Present **Framed**
- Building a PvP game with the OS windows themselves as the environment and arena.
 - Stack: GDScript, Godot, and Blender, adding custom physics and collision detection for non-traditional arenas.
- 10/22 - 11/24 **Professional Athlete**
- U16 Squash Nationals | U18 Volleyball Nationals.
-

Additional Information

- **Languages:** English (Native), German (Native)
- **Interests & Skills:** Mathematics, Machine Learning, Game Theory, Web Development, Artificial Intelligence, Autonomous AI Agents, Game Development, Human-Computer Interaction (HCI), Large Language Models (LLMs), Procedural Content Generation, UI/UX Design
- **Programming:** React, Next.js, React Native, Python, JavaScript, Typescript, Java (can adapt quickly to new languages or frameworks)

PS: I don't have much experience, but I'm a fast learner, and I've actually been told so by many people. I just want to learn from and work with the best people
